Client Home

On tap the card will slide up and out to fill the screen and the main description will fill in the screen.  
Example: <http://bit.ly/2hWUPhw>

Guest Mode - Main tool description

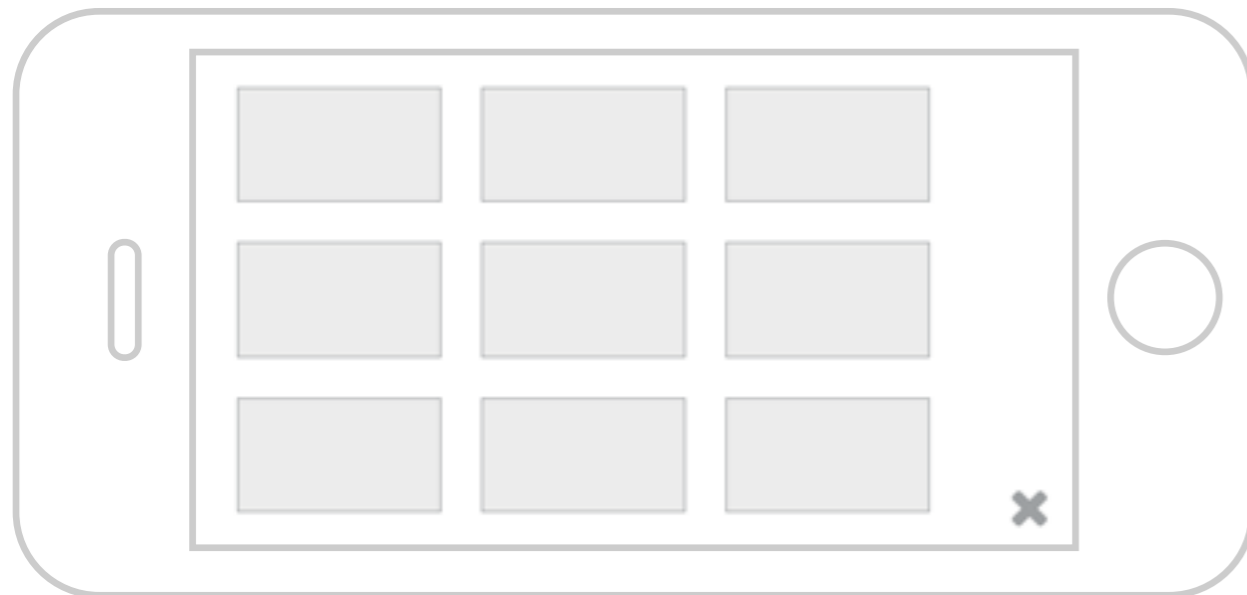

Guest Mode - Detail view

# Guest Mode - Past Presentations

## Presentation (client)

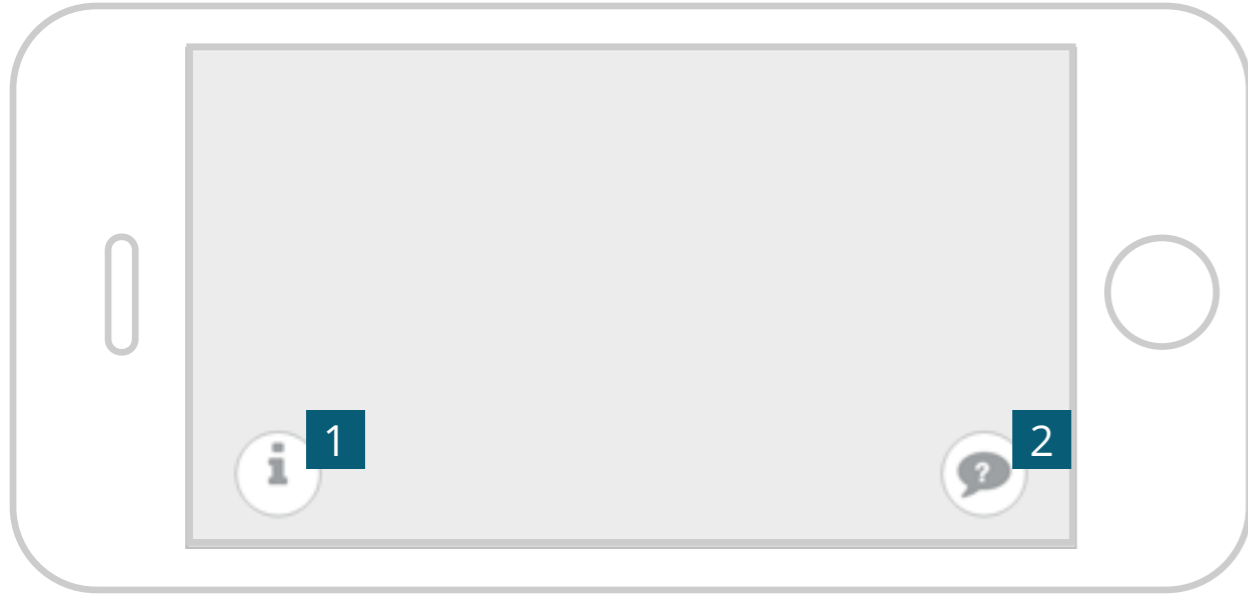

This is the view a client would see when viewing a previously presented slide deck.

## Presentation slide mode (client)

This is the screen where the client is able to quickly change slides by tapping on a thumbnail view.

# Presentation Mode

## Presentation

This is the view a client would see when using the app and is apart of a presentation group. The client is able to **ask for more information** 1 about a slide being presented or to **notify the presenter that they have a question.** 2

## Admin Presentation Mode-

This is the view a presenter would see. During the presentation to **jump to other slides** 3 they would just tap the icon in the lower right corner.

**Admin Presentation Mode- Question**  
During the presentation a client may ask a question and an icon in the upper left corner will appear to notify the presenter. A simple tap will dismiss the notification.

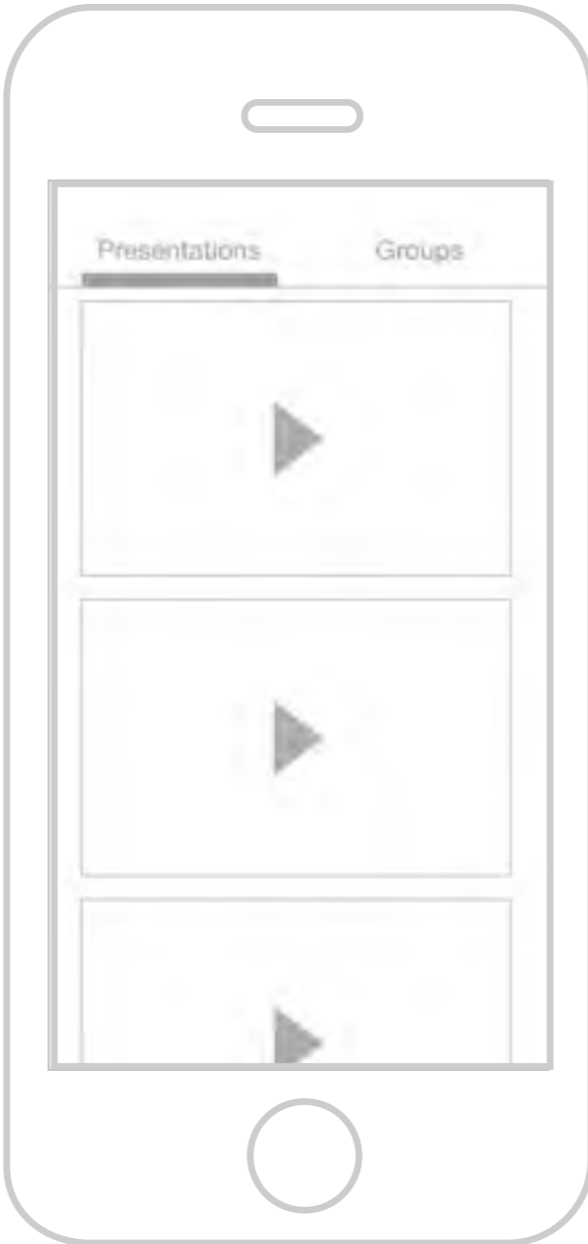

**Admin Presentation Mode- Slides**  
This is the screen where the presenter is able to quickly change slides by swiping left or right. Or choose to **End the presentation.** 4

# Admin Mode

**Admin Home**  
The admin can choose to view groups or presentations.

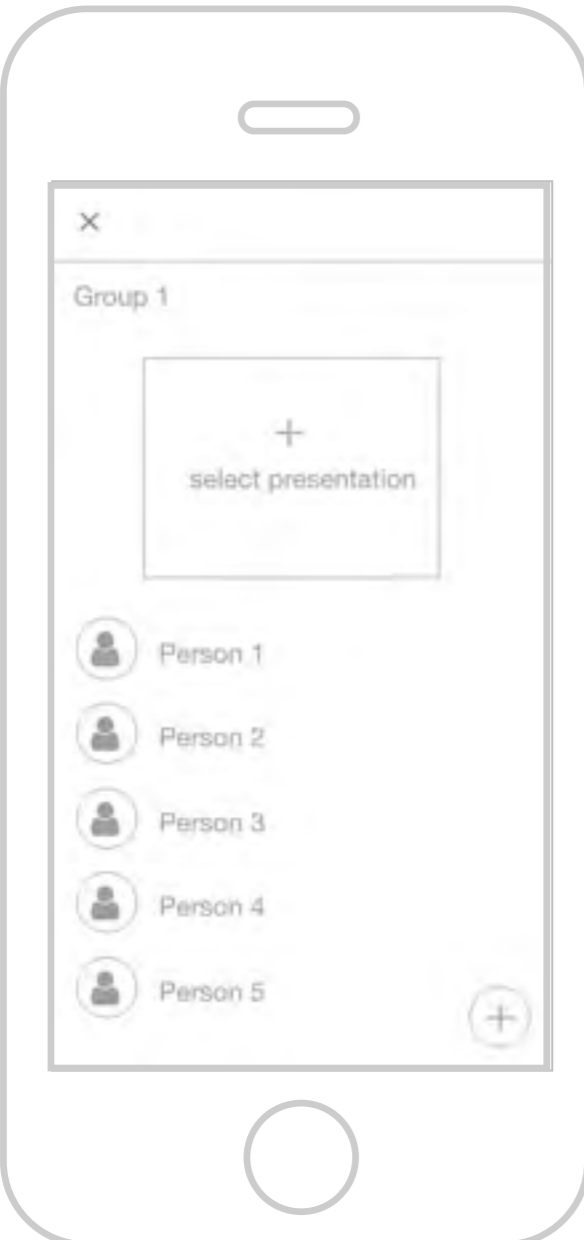

**Presentations List**  
The admin will be able to select a presentation to review.

**Group List**  
On tap admin will be able to review an existing group or create a new one.

# Admin Mode - Groups

Group Detail  
(no presentation)

Group Detail  
(presentation)

Add Member List  
After you select a guest they get put on the list and the plus turns into a check.
